AUTHOR INDEX TO VOLUME 3

This index lists, in alphabetical order, the names of authors of all articles, abstracts, letters, editorials, and posters. Full citation is provided under the first author only, with reference made from joint authors. Abstracts, letters, editorials, and posters are distinguished from articles by the following code: A = abstract, L = letter, E = editorial, and P = poster.

A

- Abrams BM, see Reiss JE
 Agamanolis DP, Askari AD, DiMauro S, Hays A, Kumar K, Lipton M, Raynor A: Muscle phosphofructokinase deficiency: two cases with unusual polysaccharide accumulation and immunologically active enzyme protein, 456-467
 Alberca R, see Rafel E
 Albers JW
 see Hodach RJ
 see Willems WJ
 Allard EP, see Cosmos E
 Allen IV, see Craig ID
 Anderson DM, see Schliselfeld LH
 Angelini C, see Bormioli SP
 Ängqvist K-A, see Sjöström M
 Aniansson A, Grimby G, Nygaard E, Saltin B: Muscle fiber composition and fiber area in various age groups, 271-A
 Appel SH, see Plishker GA
 Asbury AK, see Johnson PC
 Askari AD, see Agamanolis DP

B

- Bailey AJ, see Duan VC
 Baker JH, Hall-Craggs ECB
 Changes in sarcomere length following tenotomy in the rat, 413-416
 Recovery from central core degeneration of the tenotomized rat soleus muscle, 151-159
 Baran EM, Grover W: Clinical and pathological correlates of the P₂ component of the lumbar spinal evoked response, 436-A
 Barchi RL
 Physical probes of biological membranes in studies of the muscular dystrophies, 82-97
 see Hayward BS
 Barden MT, see Bergen BJ

- Barron SA, Crohn T, Paigen B: Peripheral nerve function at a site of environmental contamination, 436-A
 Bauer S, see Hallett M
 Bautista J, see Rafel E
 Bergen BJ, Carry MP, Wilson WB, Barden MT, Ringel SP: Centronuclear myopathy: extraocular- and limb-muscle findings in an adult, 165-171
 Berthillier G, see Carrier HN
 Besinger UA, see Toyka KV
 Biondi A, see Zellweger H
 Black CM, see Duan VC
 Blomstrand E, see Henriksson J
 Blood J, see Wiechers D
 Bonilla E, see Schotland DL
 Bonilla E, Schotland DL, Wakayama Y: Application of lectin cytochemistry to the study of human neuromuscular disease, 28-35
 Bormioli SP, see Sartore S
 Bormioli SP, Lücke S, Angelini C: Abnormal myomuscular junctions and AChE in a congenital neuromuscular disease, 240-247
 Bormioli SP, Sartore S, Torresan P, Schiaffino S: Slow-tonic fibers in human muscle, 266-A
 Bouche P, see Lovelace RE
 Bowers D, see Weber RJ
 Bradley WG: Cell membrane abnormalities and muscular dystrophy, 1-E
 Bray F, see Singer PA
 Brooke MH, Carroll JE, Ringel SP: A reply, 98-L
 Brown WF, Yates SK: Survival of lumbrical motor fibers in late-stage median nerve entrapments, 436-A
 Burke RE: The concept of muscle fiber and motor unit types, 266-A
 Burke RE, Dum RP, O'Donovan MJ, Toop J, Tsairis P: "Fast-slow" nerve-muscle cross-union in the adult cat: asymmetry of effects, 279-A
 Butler J, see Cosmos E
 Bylund-Fellenius A-C, see Sjöström M

- Bylund-Fellenius A-C, Elander A, Scherstén T: Can hypoxia induce an increased respiratory capacity in skeletal muscle tissue?, 274-A

C

- Caccia MR: Experimental myotonia, 444-L
 Campbell WW, Ward LC, Swift TR: Nerve conduction velocity varies inversely with height, 436-A
 Cantini M, see Sartore S
 Carrier HN, Berthillier G: Carnitine levels in normal children and adults and in patients with diseased muscle, 326-334
 Carroll JE, see Brooke MH
 Carry MP, see Bergen BJ
 Charron L, see Peyronnard J-M
 Cimino V, see Zellweger H
 Cockrell JL, see Levine SP
 Cosmos E, Butler J, Mazliak J, Allard EP
 Animal models of muscle diseases, part I: avian dystrophy, 252-262-P
 Animal models of muscle diseases, part II: murine dystrophy, 350-359-P
 Cosmos E, Butler J: Animal models of muscle diseases, part III: compilation of therapeutic trials for hereditary muscular dystrophy, 427-435-P
 Craig ID, Allen IV: Tubular aggregates in murine dystrophy heterozygotes, 134-140
 Crohn T, see Barron SA
 Crutchfield C, Gutmann L: The inheritance of median-ulnar communications, 181-A
 Danilowicz D, Rutkowski M, Myung D, Schively D: Echocardiography in Duchenne muscular dystrophy, 298-303
 Dau PC, see Milner-Brown HS
 Dau PC
 Plasmapheresis in neurologic disorders, 529-L

Plasmapheresis therapy in myasthenia gravis, 468-482
 Daube JR, see Lin JT
 Daube JR, Service FJ, Dyck PJ: Acute effects on nerve conduction of strict control of blood sugar with an artificial pancreas, 437-A
 DeLisa JA, see Halter SK
 DiMauro S, see Agamanolis DP
 DiMauro S, Trevisan C, Hays A: Disorders of lipid metabolism in muscle, 369-388
 Domingue J, see Shahani BT
 Domingue J, Shahani BT, Young RR: Conduction velocity in different diameter ulnar sensory and motor nerve fibers, 437-A
 Drachman DB, see Murphy A
 Dresner M, see Singh S
 Duane VC, Black CM, Dubowitz V, Hughes GRV, Bailey AJ: Polymyositis—an immunofluorescence study on the distribution of collagen types, 487-490
 Dubowitz V
 see Duane VC
 see Maund-Sewry CA
 Dum RP, see Burke RE
 Dung HC, see Herring JM
 Dyck PJ, see Daube JR
 Dyro F, see Hallett M

E

Eberstein A, Goodgold J
 A reply, 445-L
 Muscle fiber conduction velocity with surface electromyography, 437-A
 Edman A-C, see Sjöström M
 Edström L, see Hultman E
 Eggleston JC, see Murphy A
 Eisenberg BR, Salmons S: Stereological analysis of sequential ultrastructural changes in the adaptive response of fast muscle to chronic stimulation, 277-A
 Elander A, see Bylund-Fellenius A-C
 Emmerich M, see Pette D
 Eriksson P-O, see Thornell L-E
 Essén B, Henriksson J: Metabolic characteristics of human type 2 skeletal muscle fibers, 263-A

F

Fidzianka A, see Hausmanowa-Petrusewicz I
 Fisher MA: F-response latency-duration correlations: an argument for the orderly antidromic activation of motoneurons, 437-A
 Freal JE, Kraft GH: A method for reducing the variability of motor nerve conduction velocity measurement evaluated in end-stage renal disease, 438-A
 Fujimoto WY, see Stolov WC

G

Galbo H, see Henriksson J
 Giebfried J, see Ma DM
 Goff R, see Schimmel SD
 Goldner MM, see Kim YI

Goldspink G: Muscle fiber growth in adults, 271-A
 Gonzalez-Serratos H, see Somlyo AP
 Goodgold J, see Eberstein A
 Goren H, see Mitumoto H
 Gorodetsky R, see Maund-Sewry CA
 Griffith IJ, see Norcross NL
 Grimby G, see Aniansson A
 Grisolia JS, see Wiederholt WC
 Gross JA, Hamilton WJ, Swift TR: Isolated mechanical lesions of the sural nerve, 248-249
 Grover W, see Baran EM
 Gullotta F, see Zellweger H
 Gustavsson L, see Sjöström M
 Gutmann L, see Crutchfield C

H

Haining JL, see Mishra SK
 Hall-Craggs ECB, see Baker JH
 Hallett M, Bauer S, Khoshbin S, Dyro F, Kneisley L, Mandell J: Reflexes of the external urethral sphincter, 185-A
 Halter SK, DeLisa JA, Stolov WC, Scardapane D, Sherrard DJ: Carpal tunnel syndrome in chronic renal dialysis patients, 438-A

SUBJECT INDEX TO VOLUME 3

This index gives the first author (in parentheses) and first page of the article, abstract, letter, poster, or editorial in which the indexed subject occurs. The reader is referred to the author index for the full title and coauthors, where appropriate, of the piece. Abstracts, letters, posters, and editorials are distinguished from articles by the following code: A = abstract, L = letter, P = poster, E = editorial.

A

- Abetalipoproteinemia
peripheral neuropathy (Miller) 181-A
- Acetylcholine receptor (AChR)
measurement by ELISA (Norcross) 345
in myasthenia gravis (Murphy) 293;
(Norcross) 345
- Acetylcholine receptor antibodies
measurement by ELISA (Norcross) 345
myasthenia gravis and plasmapheresis
(Dau) 468
- Acetylcholinesterase
in congenital neuromuscular disease
(Bormioli) 240
- 4-Aminopyridine
effects on neuromuscular transmission
in disease (Kim) 112
effects on normal neuromuscular trans-
mission (Kim) 105
- Amyotrophic lateral sclerosis
muscle fiber conduction velocity (Yaar)
442-A
plasmapheresis (Dau) 529-L
- Amyotrophy—neuralgic
anterior interosseous nerve palsy (Ren-
nels) 160
- Animal models
avian dystrophy (Cosmos) 252-P; 427-P
murine dystrophy (Cosmos) 350-P;
427-P
- ATPase activity
actomyosin (Mabuchi) 227; 233
in sarcoplasmic reticulum from dys-
trophic mouse strain (Neymark) 316
- Autosomal recessive myotonia congenita
(see Myotonia congenita)
- Avian muscular dystrophy (see Muscular
dystrophy—avian)
